# An increasing number of AI capabilities embedded in organizations over the past 5 years

- AI adoption has more than doubled. In 2017, 20% of respondents reported adopting AI in at least one business area, whereas today, that figure stands at 50%, though it peaked higher in 2019 at 58%

Average number of AI capabilities that respondents' organizations have embedded within at least one function or business unit<sup>1</sup>

Share of respondents who say their organizations have adopted AI in at least one function, %

# Use cases by domain

Top use cases

Use cases by function

## Most commonly adopted AI use cases within each business function, % of respondents<sup>1</sup>

### Service operations<sup>2</sup>

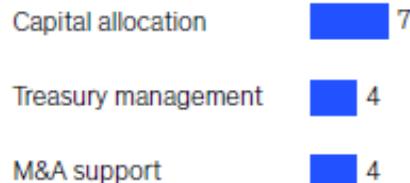

### Marketing and sales

### Risk

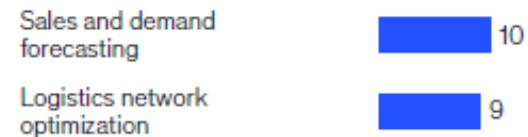

### Strategy and corporate finance

### Product and/or service development

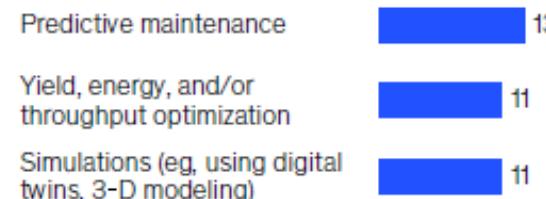

### Supply chain management

### Human resources

### Manufacturing

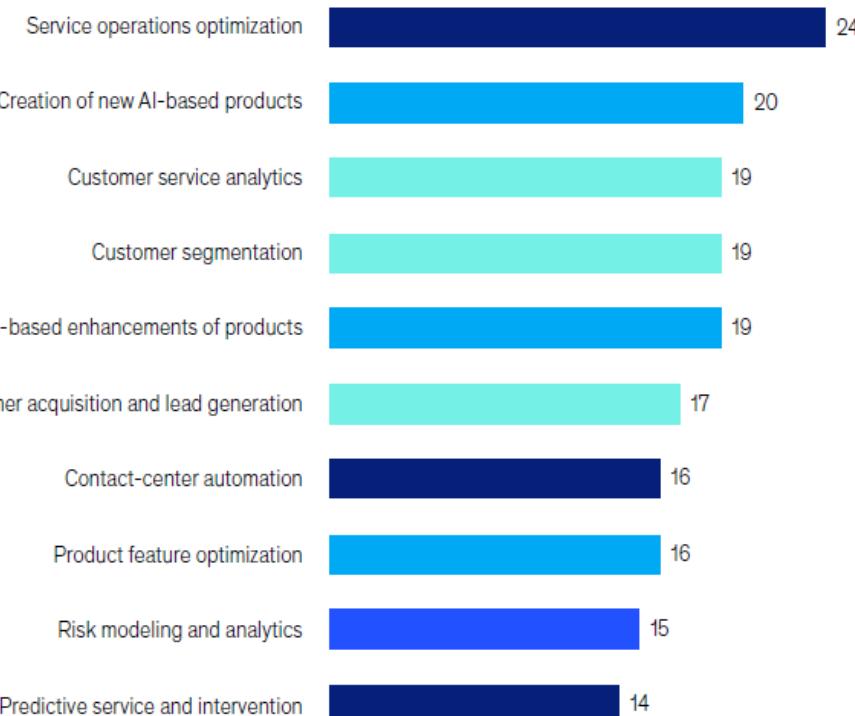

Top use cases

Use cases by function

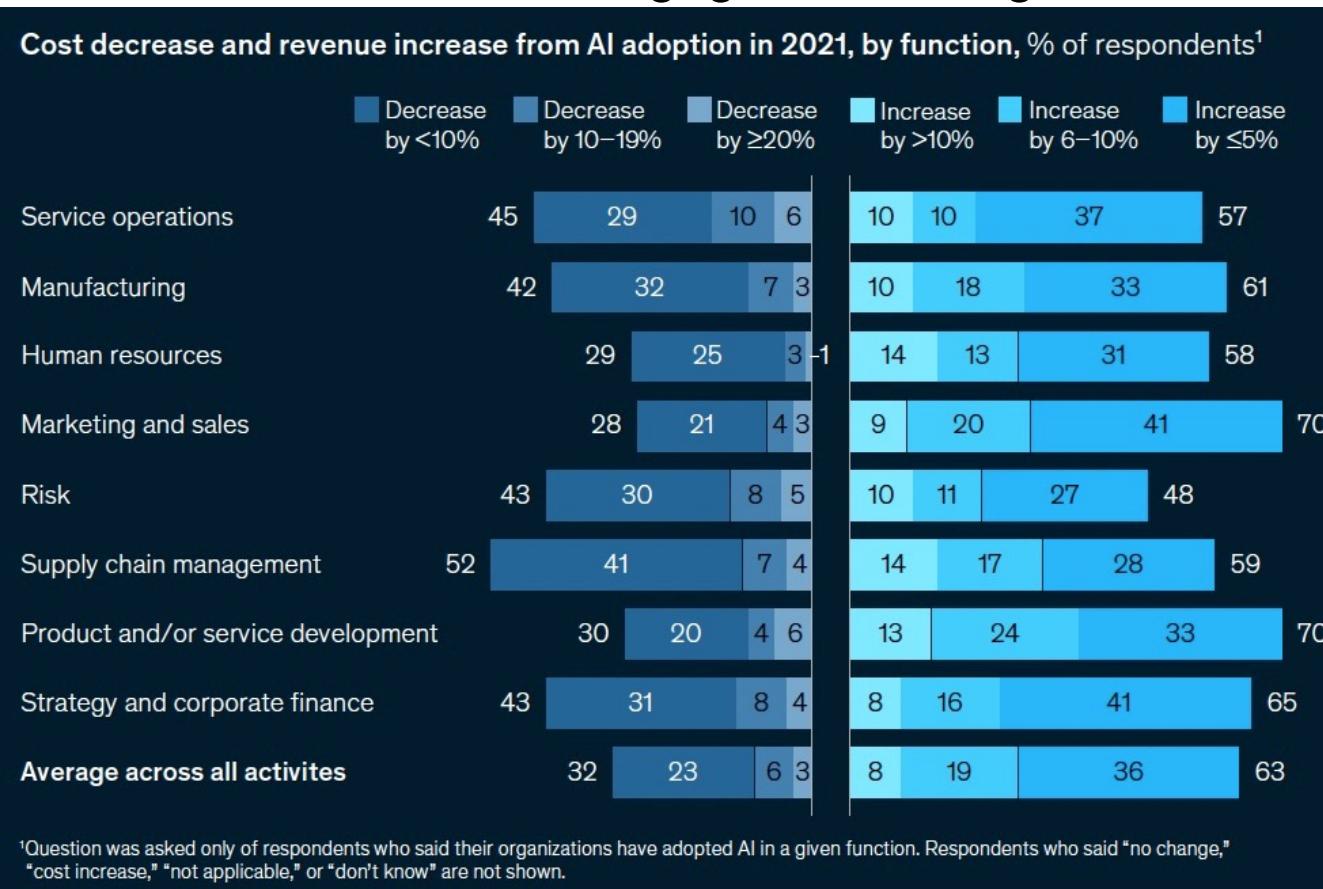

## Most commonly adopted AI use cases, by function, % of respondents<sup>1</sup>

■ Service operations<sup>2</sup> ■ Product and/or service development ■ Marketing and sales ■ Risk

# Expectations on revenue growth, cost reduction and risk control

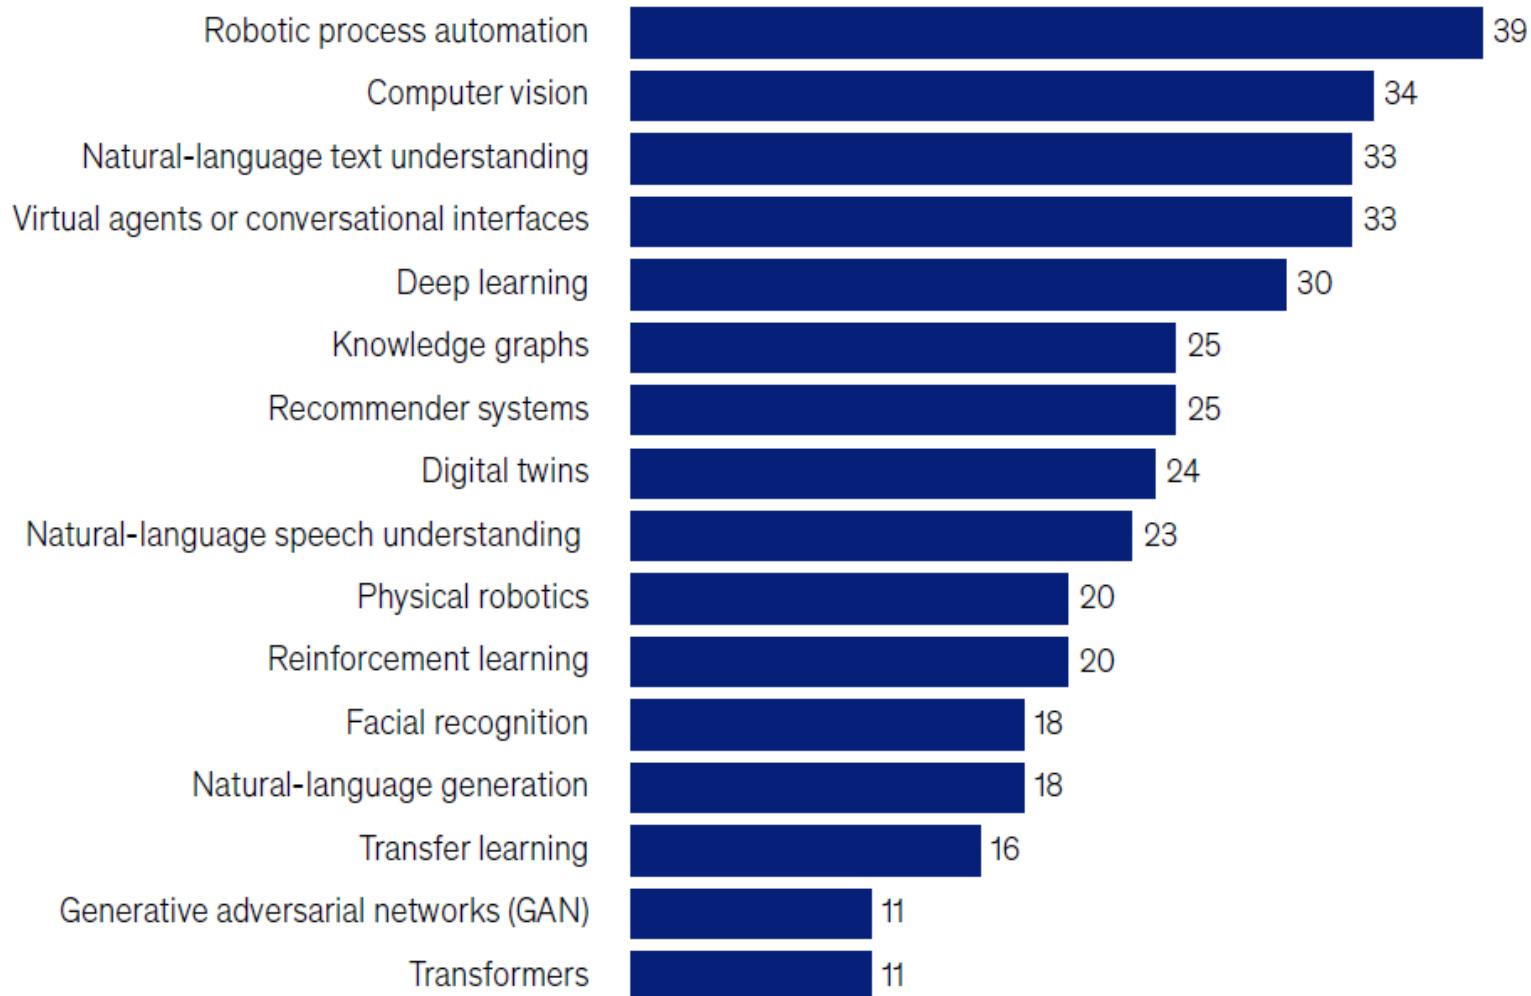

- Today, the largest reported revenue impacts are in marketing and sales, product and service development, and corporate strategy and finance:
  - Revenue growth in marketing and sales, product and service development
  - Cost reduction in supply chain management
- Furthermore, the level of engagement of organizations in mitigating AI-related risks remains broadly stable.

# Top Best Practices/Attention Points in Data Science & IA

# Capabilities built into products and business processes

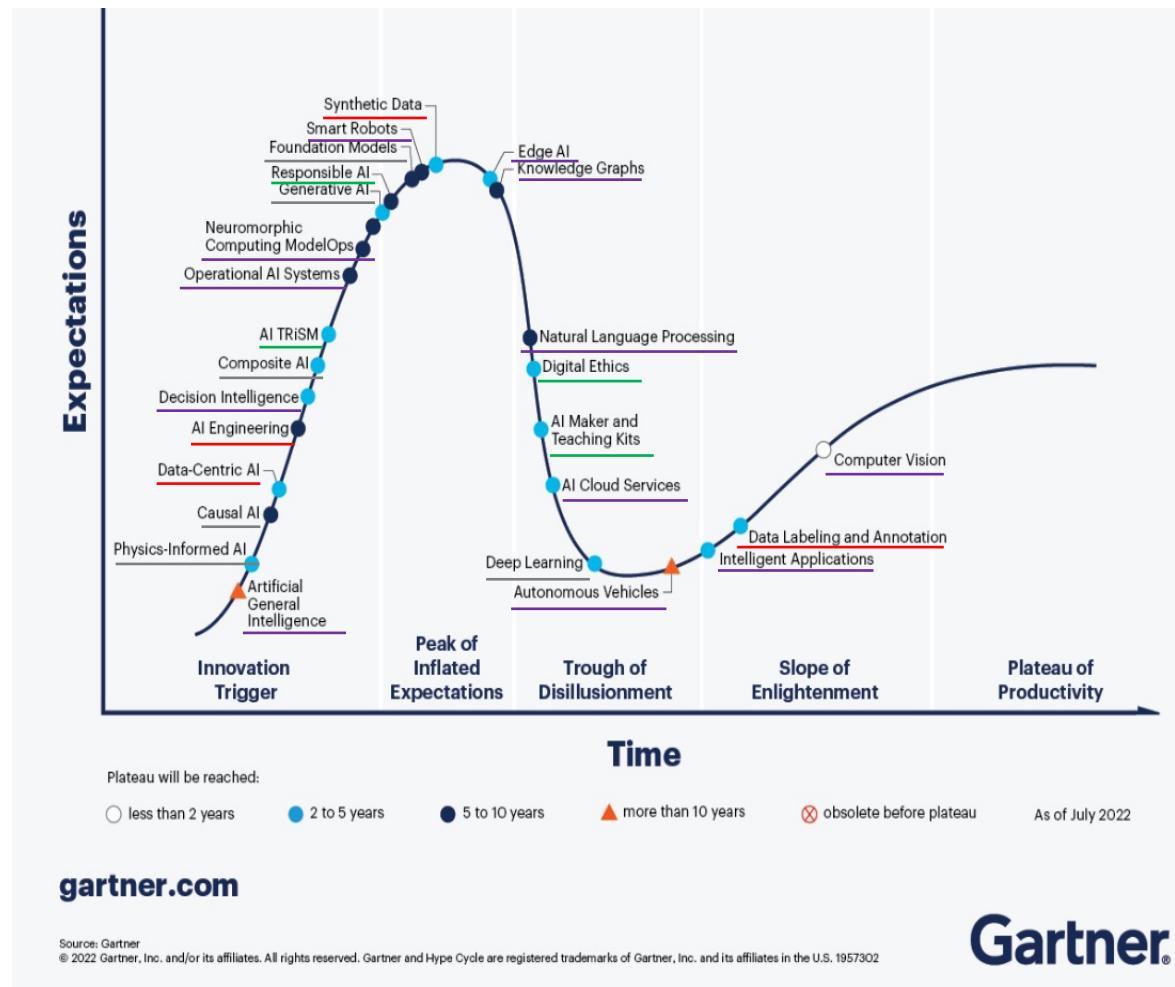

<sup>1</sup>The number of capabilities included in the survey has grown over time, from 9 in 2018 to 15 in the 2022 survey.

<sup>2</sup>Question was asked only of respondents who said their organizations have adopted AI in at least one function.

# Innovations in Data Science & AI in 2022

- Innovations in Data Science & AI continue to deliver significant business benefits and adoption rates will accelerate in the years to come

According to the following axes:

- Data
- Algorithms
- Applications
- Human

# Thank You
